    The compns. comprise cement, sand, acetate-ethylene copolymer,
AB
    soluble cellulose ether, superplasticizer, air-entraining agent,
    extrusion-facilitating agent (microsilica), waterproofing agent,
    and reinforcing fibers, e.g. polypropylene fibers. The cement
    /sand ratio is 1:(1-5). The resulting compns. are packed in flexible bags
    which may also be used for mixing the compns. with water before use. The
    product is especially suitable for coating concrete surfaces.
